## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election without traverse of the invention of Group 1 (claims 1-22) in the reply filed on 10/16/2008 is acknowledged.

### ***Claim Rejections - 35 USC § 102***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

1. Claims 1-4, 6, 9-10, 12, 14-21, 79-101 are rejected under 35 U.S.C. 102(b) as being anticipated by Bolanos et al-5,690,269.

As to claims 1-4, 6, 9-10, 12, 14-21, 79-101, Bolanos et al-5,690,269 (F 6-8, 12-13) discloses an end effector apparatus 180 comprising end effector/jaws/grasper/medical device 124 (having links pivoting about pins 122 and 134, F 6-7), a deflecting mechanism including tubular distal portion 186 (defining a lumen, a proximal opening and a side gap) pivoting relatively to tubular proximal portion 184 (defining a lumen, a proximal opening and a side gap) by pins 120 (F 8), 1<sup>st</sup> actuator or wire 96 to deflect distal portion 186 relatively to proximal portion 184 and 2<sup>nd</sup> actuator or wire 70/142 to effect effector or jaws 124 or medical device substantially as recited in the claims.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 22 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bolanos et al-5,690,269.

As to claim 22, Bolanos-269 does not explicitly disclose the effector assembly of device 180 is made of a metal capable of receiving a current. However, it would have been obvious to one of ordinary skill in the art to make the effector 124 of a conductor material, such as a metal capable of receiving a current, as metal is well known material for making a medical device.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 3773

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
